October 12th & 13th | Onsite Conference
Hotel Birger Jarl, Stockholm

October 12th | drinks reception & dinner

Speakers & Moderators include:

ahlsell  norwegian  HM  ERICSSON  NORDEN  NORDEN  MAERSK DRILLING
GETINGE  IKANO BANK  Lantmannen  AstraZeneca  EY
norwegian  norwegian  MTR  exergi  arjo  norwegian

Expert Organizations:
ivalua  GEP  interos  Sievo  HICX  Basware  Magnt  C2FO  SAP  Coupa

Organizer:
CPO Outlook
Why join CPO Outlook 2022?

EBG know how busy you are. How much is on your and your teams plate. What’s at stake. That the demands are rising and time is just not enough.

We want you to join CPO Outlook to meet with 100 peers that face the same scenarios as you and are willing to share their experiences with you.

We believe these occasions are rare.

At CPO Outlook you have informal yet to the point conversations with as many as is possible. CPO Outlook is not a fair - it is a think tank and a way to find concrete solutions to Your challenges. To encourage You and to support You as you continue the very important work You do. CPO Outlook is made for you with an interest to develop procurement as an end to end structure. Across functions and in-between organizations.

Only here can you in the Nordics and beyond meet with experts in different areas and learn from their know how at the same time as you draw from a peer group ideas and thoughts.

CPO Outlook is based upon numerous Theme Discussions - round table discussions and Focused Theme Discussions - workshops. Informal yet to the point with limited seats. Below a high level overview of what you can choose from. EBG | Network have enabled networking summits since 2010 and look forward to seeing you again!

How about Online? For you who cannot join us onsite in Stockholm there is an online option. Not the same as Online, Online you can enjoy demos and customer cases as well as finding and networking with peers sharing Your interests. Learn more via cpooutlook.com

We hope to see you in person or online for the Only End to End procurement summit in the Nordics in 2022!

Welcome!
Anna & Lars Bjärkerud

How do you meet others sharing the same interests as You in an informal yet to the point way? At CPO Outlook 2022 you can finally meet and discuss with peers and experts about matters important to You!

10:00 • Registration open and coffee is served

10:30 • Opening of CPO Outlook 2022 | Day 1

09:10 • Preparing procurement and supply chain for the future

Reflections | How can companies develop procurement and supply chain through business acumen?
Let’s kick start the summit with two perspectives on the challenges and opportunities procurement and supply chain face. How can companies think ahead to ensure category management strategies and plans are agile with all disruptions in supply chain? How can companies and procurement professionals make sure they are truly connected to business acumen?

This open a question often discussed at an EBG summit - How may Category Management need to develop? As more and more insights are demanded, as the need for efficiency and effect continue to grow in volatile markets. How can You ensure you get the buy in needed?

Benny Hall | CPO | MTR Nordic Group & Grant Morrison | Director, Head of Category Management | Maersk Drilling

10:00 • Networking Break

10:30 • Technology enabled 360 business impact

Keynote Remote | Accenture’s Business Transformation: Technology enabled 360 business impact
EBG met up with Kai Nowosel, Chief Procurement Officer at Accenture online to learn about Accenture’s procurement transformation

Session enabled by Icertis

11:00 • Change Session Transition Time...

11:10 • Theme Discussions aka Interactive Round Table Discussions | Session 1

These round table sessions are made to enable You to discuss common challenges and opportunities with experts and peers. You choose before hand and there is a maximum number of seats at each table to enable You to have fruitful experience exchange. Each session is held twice - same topic - new crowd.

11:10 • Increasing supplier collaboration to unlock value

Supplier Collaboration: How do you unlock the value within your supply chain
With current supply chain disruptions the position of Procurement & Supply chain professionals is stronger than ever. But what are some practical ways to stay prepared in a VUCA world? And how do you make yourself more attractive to your suppliers and use this to cement the relationship.

Join this session to learn more on:
- Sharing new ways of collaborating with suppliers
- How to connect supplier innovation to other departments
- What initiatives such as ESG & Supplier Risk mean for skills requirements & development
- How to turn current-strategic supplier initiatives into future competitive advantages
- Turning automation into a competitive advantage

Henrik Nyberg | Account Executive and Nordic Lead | Ivalua

11:10 • Improve Contract Lifecycle Management (CLM)

How can you build Resilient and Sustainable Supply Chains with Contract Lifecycle Management (CLM)
Today’s procurement departments are expected move fast to deliver continued cost savings and process innovations through a global supply chain defined by disruption, inflation, and heightened expectations around responsible sourcing. Contracts define what a company buys and on what terms yet have remained stagnant as the world around them grew more digital, specialized, and connected. Learn how to digitally transform these powerful agreements to deliver the insights and automation procurement need to move faster, realize value, and build trust between their partners and the world.

Discuss;
- How can you stay ahead of competition, stay agile and create a single source of truth with contract intelligence?
- How can you control supplier risk and performance?
- How do you secure transparency and agility across the supplier network?

Niklas Karlsson General Manager | Northern Europe | Icertis
Supply Chain Disruption: How can you reduce risk in an unpredictable environment?

Providing financial support to thousands of suppliers relieves the burden of financial stress from the supply chain, while relieving the workload burden of procurement. Going beyond the limitations of supply chain finance can ensure financial health, help mitigate cost inflation and ease the workload. But what does that mean for you and how can you use this in your business to get the greatest benefit? During this session you will discuss ways of protecting your supply and strengthening supplier relationships to the financial benefit of all parties.

Discuss:
- What impacts are inflation, shortages and delays having on your supply chain?
- How has supply chain finance evolved and how is it being used to efficiently adapt to the extremes of disruption that seem commonplace today?
- How can procurement, supply chain and finance effectively collaborate to ensure maximum effect?
- How to segment, roll-out and govern a financial support program over time?

Matt McCullin | Managing Director, Business Development | C2FO

How have Sustainable Procurement Improvement & Impact evolved?

New forces like net-zero carbon commitments, new regulations, consumer expectations, digital transformation imperative and investor and finance ESG market demands, are causing leaders to raise the ambition of their sustainable procurement programs beyond resilience to driving measurable “improvement and Impact”.

In this session, we’ll explore trends and forces including:
- The Norwegian Supply Chain Transparency Act, The EU proposal on Corporate Sustainability Due Diligence
- The convergence of ESG reporting frameworks and the radical shift in Climate action expectations and strategy, together with the growth in greenwashing scrutinisation/scrutinisation
- Practical experiences including;
  - How can leading procurement teams respond to set Impact and Improvement as their new “North Star” for their programs?
  - What tools/indicators – and engagement strategies are they using to not just monitor, but engage suppliers in an improvement journey for environmental, carbon, social and ethical performance?

Robert Ekqvist | Enterprise Account Executive, Nordics & Baltics | EcoVadis

What is Supply Chain Resilience in 2022?

Global supply chains are being reconfigured in response to disruptive events. Supply chain disruptions are frequent, expensive and often hidden from view. Risk practices and technology adoption require improvement. Operational resilience is a multiplayer game. Achieving operational resilience is not something one organization can do on its own it requires collective responsibility. Developing operational resilience requires support of suppliers and strategic partners. Most executives agree they need to do a better job of external engagement. During this session you will discuss challenges and opportunities in physical and financial supply chain risk mitigation.

Discuss:
- Which are the Geopolitical Risk on Supply Chain Leaders’ Minds?
- Which are the Concentration Risk in High-Tech Supply Chains?
- Operational resilience as a multiplayer game - how can you ensure collective responsibility?

Geraint John | Vice President, Interos Resilience Lab | Interos

Developing Supplier Experience Management

How can you capitalize on the benefits of Supplier Experience Management?

Traditional ways of working with suppliers are no longer sufficient to drive the levels of engagement and collaboration needed for the future. As disruptive events continue to challenge supply chains and Procurement, organizations that do not adjust their approach will face more risks and suffer from less transparency, while losing customer-choice status to competitors. Supplier experience management unlocks the crucial elements needed to reduce friction and set suppliers (and you) up for success.

Discuss:
- How has the buyer-supplier relationship changed in recent years?
- What pain points do suppliers experience in working with large enterprises?
- How can these issues be addressed with technology?
- How can enterprises benefit from providing enhanced supplier experiences?

Steve Cobley | Regional Sales Director EMEA | HICX

How do you maintain a competitive edge in a volatile environment & how do you develop agility in a complex multi-tier supply chain setting?

Scaling best practices has never been more essential as new legislation, geopolitical events and unprecedented supply chain challenges impact the entire supply ecosystem. Come to hear and share practical examples on how to thrive in the new equilibrium.

We will discuss:
- Bad news early is good news: how to map and evaluate all the nodes of your supply chain?
- How do you create a pragmatic approach to the balancing cost, sustainability and compliance?
- In what ways can you incorporate supply chain risk into daily operations including tail suppliers?
- What are the winning strategies for retaining control while extending your core processes beyond your organization?

Paul Tervo | Head of SAP Business Network, EMEA | SAP

Bridging the Gap: How do you operationalize your organization’s ESG strategy in procurement and supply chain

There is significant pressure from investors and consumers to improve ESG performance (Environmental, Social, Governance factors), particularly in Scope 3. Regulatory pressures are also on the horizon. Understanding where these emissions come from is a huge challenge in itself. If you can measure them, understanding the levers to pull to improve them is also difficult and generally needs a change in supply chain strategy, including fundamental supplier management approaches.

Join this discussion to discuss:
- What is ESG performance in Scope 3?
- What regulatory pressures are on the horizon?
- How can you measure emissions from your external supply chain?
- In what ways do you communicate and collaborate with your suppliers about Scope 3 and other affecting aspects?

Natalie Henfrey | Director - Consulting | GEP

Anticipating Supply Chain Risk

Anticipate Supply Chain Risk: How can you become prepared for the unpredictable

Unexpected events and supply chain disruptions have become the norm. What if you were able to foresee critical risk situations and protect your supply chain before the impacts materialize?

Join us to discuss pressing topics with expert and peers in an informal roundtable setting:
- Which events are affecting supply chains the most in 2022?
- What proactive measures are currently being implemented to mitigate or anticipate risk?
- What are best-in-class risk anticipation strategies?

Jorge Rodriguez | Director Revenue Europe | riskmethods
We will discuss:

- How do we develop our suppliers to implement circular business models?
- How can we measure progress?
- How do we get the best outcome working with a broad and global supplier base?
- How do circular business models differ between Commercial and Non-Commercial Goods?

Anna Erasmie | Head of NCG Procurement | H&M

#cpooutlook2022
Raising the maturity level in indirect procurement

How do you raise the level of maturity within indirect procurement?

There are many companies experiencing challenges in structuring indirect procurement. For small to midsize companies, indirect procurement is often forgotten or only has a small resource team focus. This raises challenges for capturing spend, leveraging scale and challenges finding the best fit S2C systems. Typically, you find buyers spread through organization where indirect buying is a secondary task. During this discussion you will share experiences developing indirect procurement starting from zero. What do you do when you don’t have the data or a clear governance structure? When you aim to have centralized insights yet still will have de-centralized buying? When spend is not big enough for a complex source to pay system yet the business need to control spend?

Discuss: 
- How can you create central purchase to pay governance when buyers are not professional purchasers?
- How do you mature an indirect organization starting from zero?
- How can you manage without a S2C or P2P system yet create end to end insights?
- What are the issues you face when you cannot get a system?
- In what ways can you connect and develop a contract repository and purchase to pay data?

Manisha Mathur | Head of Procurement & Mikkel Lyhne Hansen | Category Manager – Indirect Procurement | Norden

The Dos and Don'ts in digital procurement transformation

Digital procurement transformation - The Dos and Don’ts

Digital procurement transformation is a matter of WHEN not IF. It’s now time for innovative, fast-growing companies to take the leap and transform their procurement into a world-class, revenue generating function. Implementing a S2P/P2P solutions enables companies to follow a standardized procurement process, make proactive decisions, generate savings and increase efficiency.

However, there are a few Dos and Don’ts when talking about procurement transformation, that can make or break your project. During this session we will discuss practical tips that can ensure the success of your project and situations that should be avoided to reduce project risk.

Discuss: 
- Why do fast-growing companies need a digital procurement transformation?
- How do you set your main project objectives? OR What should your main project objectives be?
- Do you think an integrated scalable solution is better than periodically adopting new systems to fit your business objectives?
- How do you deal with user resistance to change (low user adoption)?

Oskar Dahlström | Corporate Program Manager for Procurement Digitalization | Arjo & Richie Northcote, Sales Director Nordics Region, Xoomworks Procurement, part of Accenture

Positioning procurement as a Business Partner

How do you position procurement during transformation and become a business partner?

They are on a unique journey. To become a fully digitized greenfield bank using modular ‘brick by brick approach’. In just a couple of years Ikano Bank will be One Sustainable Bank. Procurement has evolved and today nothing can be bought, purchased, sourced without the procurement and sourcing function being involved. How do you become that business partner by supporting business through agile procurement? How can procurement provide right intelligence on products in market? Why sourcing in IT and Digital is a complex affair? Can we benchmark every deal?

Discuss: 
- How are you supporting organizations in their Digital transformation Journey
- Is procurement seen as bottle neck or partner which can add value
- Do we have right IT knowledge in procurement function
- How can you combine efficiency competences with business acumen in procurement
- In what ways are you using data to create a basis for decision making processes
- How can we be better in serving our business

Manish Panchmatia | Category Manager - Digital (IT) & Transformation | Ikano Bank

Due diligence in a scattered data & process landscape

How can procurement do due diligence and manage expectations in a scattered data and process landscape?

Strategies are not necessarily the problem. Change management and visualizing the connection between strategy - process - outcome is harder. Depending on what the expectations really are - how can you create a framework and help the business act in a way that meet expectations? You may or may not have a functioning systems, cleaned masterdata, unified classification and perfect processes. Most likely you have some pieces that work and some that don’t. Here you will discuss how to structure processes and create desired insights in a step by step way.

Discuss: 
- How do you visualize the connection between expectations and outcome today?
- Companies having grown through M&A - how are you centrally (if you are) performing due diligence?
- How are you acting towards the business as customer demands for facts and insights increase (yet data is scattered?)
- How do you in parallel work you way towards "perfect structures and processes"?

Tobias Dock | Senior Manager Purchasing Development | Getinge

Reflections | How are you organizing and structuring your sustainability goals?

All have them, the codes of conduct, the targets set it being Science based targets, Net Zero or other ambitious targets. The legislations are increasing as are the demands from customers. Boards will not be compliant with less than accurate sustainability reports. ESG is here to stay.

In the midst of all targets sit procurement and finance. With thousands of suppliers, few resources and not always owning the budget or the final supplier decisions. During this session we will help inspire you who feel overwhelmed or you who want to know you are on the right path.

Let’s share and discuss:
- How is sustainability organized in your organization?
- What common processes do you have to pre-evaluate suppliers, communicate results with the business and do due diligence?
- What is expected of you to meet legislations and to continue to develop according to your corporate targets?

Tobias Dock | Senior Manager Purchasing Development | Getinge, Håkan Sjöberg | Global Category Manager Energy & Utilities | AstraZeneca & Lena Ekberg | Head of Sustainability Audits | Sustainable Audits

End of Conference Day 1 - let's kick off the evening!

Stay for a drink & dinner!

EBG hope you have time for a drink and dinner. Summarize your experience, make sure to connect with people you have spoken to and relax before going back to "the real world". Dinner tickets need to be registered in advance.

We work with people, changes beyond EBG | Network control may occur.

For the Online program visit cpooutlook.com
Focused Theme Discussions 1, 2, 3 & 4

A Focused Theme Discussion is a one-time workshop where you come together to share experiences in a dedicated area. The moderator will introduce the topic to you so you all share the same perspective. After the introduction, you will discuss specific topics in smaller groups and share group insights in the room. By now you all know each other quite well which makes these sessions very valuable. Seats are limited.

Workshop | How will the role of Category Management need to develop?

With an even greater focus on digitalization and automation, increased sustainability goals and supplier enabled initiatives - how have and will category management (CM) and category managers need to evolve? Product Management (PM) is increasing across many organizations therefore CM and PM need to collaborate and succeed together. Discuss in what ways and how to drive Supplier Relationship Management throughout the organization.

Go through:
- How can the category manager support company sustainability goals through Supplier lead sustainability initiatives?
- How do you structure and achieve Senior Management buy-in?
- Why do we need to partner rather than only working with suppliers to innovate and digitalize?
- What does mean to drive an alliance model, how does this differ from a relationship model?

Workshop host: Grant Morrison | Director, Head of Category Management | Maersk Drilling
Workshop | How do you change supplier communication from a supplier to partner management perspective?
The past years it has become evident how important supplier relationships and insight is for all companies. Finding ways to collaborate and innovate together, to solve daily and strategic issues. This workshop will focus on how to make that transition, from control and oversight into communication and partnership. Considering and comparing ways of working, how to segment an often large supplier base and how to make good intentions come true. We often talk about coming closer to our suppliers – but how do we achieve it over time? During this workshop we will discuss who need to be involved on both sides and what tools and communication ways to use. Should we start treating suppliers like we treat our customers?

We will discuss:
- What is good supplier communication to you?
- In what ways and at what levels do you exchange insight today?
- How do you segment which suppliers to transition into partners?
- How are you transitioning from daily ad hoc communication to long term strategic collaboration strategies?
- Should we treat and communicate with suppliers like we treat and communicate with our customers?

Workshop hosts: Paul Salwik | Director IT & Technical Procurement, Dace Lubane | VP Business Centre and Operational Procurement & Francine Gayrard | VP Aircraft and Ground Operations Procurement

Workshop | What is true end to end source to pay to you and how do you implement it?
Most companies want insight and control long before an invoice land at someone’s desk. Sourcing wants to understand business needs in time to make informed decisions and help get the best goods and services. Procurement wants contracts to be used as intended and goods and services to be delivered as agreed. Finance wants to ensure working capital efficiency and cash control. All are reliant on suppliers co-operating and following plans.

At UPM end to end source to pay is a reality. It’s 19000 people worldwide and annual sales of EUR 10.5 billion are supported by sourcing, procurement and finance collaboration. The roadmap has considered how to improve data quality, increase process efficiency and establish end-to-end Source to Pay operating models. In addition digital sourcing capabilities have been enhanced. During this interactive workshop you will share lessons learned and compare notes with peers in the room. Take the opportunity to benchmark others strategy, process and technology choices and walk away with a clearer view over what end to end optimization could mean to you.

Discuss;
- How have you organized sourcing, procurement and finance?
- What is stopping you from end to end optimization?
- Which trends and technology advances do you think will help you ahead?
- What technology challenges are you or have you experienced?

Workshop host: Jukka-Pekka Hämäläinen | Vice President, Source to Pay Operations | UPM

Workshop | The power of procurement to shape next-generation products with de-risking supply chain
How many products have you experienced which doesn’t turn out to be commercialized well? Especially when procurement and supply chain is not involved in product development phases.

How often do companies empower procurement by early involvement and allowing it to impact overall product development to de-risk their supply chains? During this session you will discuss selective topics around involving procurement and Supply chain in product innovation - development, strengthening cross-collaboration, and making Procurement ready for such collaboration.

We will discuss;
- How does Procurement fit in New product innovation, development, and introduction
- How can you accelerate Procurement engagement with other departments?
- Checklist for Procurement team responsible for New product development
- Using supplier innovation to de-risk product
- Blueprint of Procurement involvement engagement and value driving

Workshop host: Dnyanesh Sarang | Manager - New product development and introduction SC | Cepheid (Danaher group)

Networkig Lunch Break

Contingent workforce development | Source to Pay aligned category strategies

What will be discussed during Focused Theme Discussions 5 & 6?

Keynote | How do you prepare for increased ESG legislation and regulations in a global supply chain?
This session will look at the actions and plans taken by EY in our ESG in Supply Chain strategy. ESG meaning using Environmental, Social and Governance factors to evaluate companies and countries on how far advanced they are with sustainability. EY has had an active Supplier Diversity programme for 18 years, and as a B2B have increased broader ESG efforts significantly over the past 5 years. EY’s ESG in supply chain programme includes training, policy and process review, supplier due diligence and range of category level initiatives. Here we will learn from Sian Ellis, Sustainable Procurement Assistant Director at EY in the UK about EY’s programme, what resources have been dedicated and how ESG in the supply chain aligns to EY’s broader business goals.

Learn more about;
- A short overview of the scope of the EU Directive
- The importance of ESG risk mapping and how has EY done this
- Learning and engagement with staff and targeted suppliers
- Integrating ESG into processes to make it Business As Usual

Sian Ellis | Sustainable Procurement Assistant Director | EY
Focused Theme Discussions 5, 6 & 7
A Focused Theme Discussion is a one time workshop where you come together to share experiences in a dedicated area. The moderator will introduce the topic to you so you all share the same perspective. After the introduction you will discuss specific topics in smaller groups and share group insights in the room. By now you all know each other quite well which makes these sessions very valuable. Seats are limited.

End to end process adherence related to contingent workforce management

Workshop | How do you create process adherence in an end to end flow related to contingent workforce?
Most organizations workforce consist of a contingent workforce segment. Contingent workers are not on the company payroll but provide services to an organization, such as contractors, temps, and advisers, but could also be purchased as a Service or Statement of Work. Being one of the most important assets in a company, from a procurement and finance perspective difficult to oversee and control end to end. The ability to know what it is being spent, where, and with whom is vital. How do you achieve that?

To be compliant and efficient, a company can develop standardized, cross-functional business processes, policies, compliance checks and roles across business units and regions. To further improve ways of working this can be supported, where possible, by a single information technology platform. But this is easier said than done. There are a multitude of people involved across the organization and a challenge to create adherence in an end to end flow. During this workshop you will come together with peers to discuss ways of working with the big spend segment contingent workforce. You will discuss challenges and opportunities and learn from each others approaches to gain insight and control, end to end.

Discuss:
• How do you define and create an end to end contingent workforce process? If your process includes stakeholder approval of timesheets/milestones - how do you ensure compliance and timely approval?
• How well does the classic 2- 3- or 4-way match process fit the contingent workforce flow? Self-billing vs PO-flip?
• In what ways are you handling vendor rationalization (preferred supplier usage), rate optimization, micro bidding, contract standardization and compliance (incl vetting) within contingent workforce?
• How have you divided the roles between HR, the business and procurement in relation to the continent workforce flow?
• MSP: Manage Service Provider approach (outsourcing) versus internal setup, pros and cons?

Workshop hosts: Maria Lindeborg | Head of P2P & Compliance, Group Sourcing & Joakim Sidnäs | Head of P2P Process Mgmt & Ops, Group Sourcing | Ericsson

Creating source to pay aligned category strategies

Workshop | How do you create source to pay aligned category strategies?
Source to contract, purchase to pay, requisition to pay - not seldom what is an end to end structure is divided into pieces. Leaving value untapped, creating silos and putting businesses at potential risk of not acting on valid data. This session will focus on how you can bridge those gaps and create a process and mindset that ensure a source to pay strategy for each category.

Discuss:
• How have Lantmännen chosen to organize and ensure end to end collaboration?
• What does a source to pay structure for each category mean?
• What can you do to ensure category strategies are realized from source to pay perspective?
• What are the key features ensuring category management and operational procurement collaborate?

Workshop host: Rasmus Kristensen | Head of Central Procurement | Lantmännen

Improving sustainability facts sharing with customers and suppliers

Workshop | How can companies improve sustainability facts sharing with customers and during supplier due diligence?
Given the number of suppliers all companies have, the work process ensuring codes of conduct and contracted measures are realized is daunting. What are the ways forward to minimize duplication and save time completing and gathering a range of surveys? During this workshop you will come together with peers to exchange ways of working and common challenges. What can be drawn from different industry initiatives and can and should there be more universal ways to measure sustainability?

Discuss:
• Should companies use shared platforms to ensure efficiency?
• Would additional measures be needed?
• Will this adequately meet legislation?
• What platforms and standards are acceptable? (what with so many around the world)

Workshop host: Sian Ellis | Sustainable Procurement Assistant Director | EY

15:00 Change Session Transition Time...

15:10 Actionable key take aways

What should you take away from CPO Outlook 2022? Make sure to connect and let’s go through lessons learned.

15:30 End of CPO Outlook 2022

We work with people, changes beyond EBG | Network control may occur.
Welcome to CPO Outlook 2022!

Who is who joining us in October, sharing their know how

---

What a fantastic event you two put together!
Even though we could not be there …the discussions actually did take off and new connections was established. Very well done, impressive!!
Now celebrate your success you two are sooo worth it!

# SKF

This is the 4th Summit we attend
We have always been satisfied with the lay-out of the conference. The mix of Keynotes, Round-table discussions and breaks for mingling. The fact that the conference/Summit is quite intimate adds to the value.

# Statkraft

Many thanks!
Very valuable to meet up with peers in different industries, having similar challenges and experiences. Good presentations and constructive dialogues. The online technique worked well and the prep work done by you together with all of us was fantastic. Looking forward to the next opportunity to meet up!

# IKEA

Many thanks for a fabulous conference!
Your impressive organizing helped to create a very learned and wholesome experience. I must say all your hard work paid off !!
Thanks for the profound and vivified learnings from the key note speakers, moderators, and all participants. Got to learn a lot of new perspectives. I enjoyed it a lot!!

# Stoneridge

Very good!!
Lots of good conversations, topics and also important the right participants i.e. good representation of well known exciting companies

# Husqvarna

Thank you for a great and inspiring day
And thanks to all key note speakers, expert org.'s, round table moderators and participants. I enjoyed and learned a lot from all sessions during the day.

# Orkla Foods
**Expert Organizations**

A warm welcome to this year's Expert Organizations sponsoring CPO Outlook 2022. They bring extensive know how from different areas, all there because they can help You and Your organization improve even further.

**Ivalua**
Ivalua is a leading provider of cloud-based Spend Management software. Our complete, unified platform empowers businesses to effectively manage all categories of spend and all suppliers, increasing profitability, improving ESG performance, lowering risk and improving employee productivity. We are trusted by hundreds of the world's most admired brands and recognized as a leader by Gartner and other analysts. Learn more at ivalua.com. Follow us on Ivalua.

**Icertis**
With unmatched technology and category-defining innovation, icertis pushes the boundaries of what's possible with contract lifecycle management (CLM). The AI-powered, analyst-validated Icertis Contract Intelligence (ICI) platform turns contracts from static documents into strategic advantages by structuring and connecting the critical contract information that defines how an organization runs. Today, the world's most iconic brands and disruptive innovators alike trust icertis to govern the rights and commitments in 10 million+ contracts worth more than $1 trillion, in 40+ languages and 90+ countries. icertis.com

**Interos**
Interos is the operational resilience company — reinventing how companies manage their supply chains and business relationships — through a breakthrough SaaS platform that uses artificial intelligence to model and transform the ecosystems of complex businesses into a living global map, down to any single supplier, anywhere. Reducing months of backward-looking manual spreadsheet inputs to instant visualizations with continuous monitoring, the Interos platform helps the world’s companies reduce risk, avoid disruptions, and achieve dramatically superior resilience. Businesses can uncover game-changing opportunities that radically change the way they see, learn and profit from their relationships. Based in Washington, DC, Interos serves global clients with business-critical, interdependent relationships. The fast-growing private company is led by CEO Jennifer Bisceglie and supported by investors Venrock and Kleiner Perkins. interos.io

**HICX**
HICX helps Global 5000 companies to take control of their supplier data and to deliver a great supplier experience. The HICX Supplier Experience Management platform enables businesses with thousands of suppliers to efficiently onboard and manage the end-to-end lifecycle of all suppliers, to achieve a single version of truth for all supplier data, and to remove the friction from supplier relationships. Some of the world’s largest companies, trust HICX for the management of their supplier data, these include Unilever, Mars, Mondelez, Lenovo, Baker Hughes, Orkla, BAE Systems and EDF Energy. Learn more via hicx.com

**Basware**
Basware offers the largest open business network in the world and is the global leader in providing networked source-to-pay solutions, e-invoicing and innovative financing services. Our technology empowers organizations with 100% spend visibility by enabling the capture of all financial data across procurement, finance, accounts payable and accounts receivable functions. Basware is a global company doing business in more than 100 countries and is traded on the Helsinki exchange (BAS1V: HE). Find out more at basware.com

**riskmethods**
riskmethods empowers businesses to identify, assess and mitigate supply chain risk. By using artificial intelligence, we help customers automate and accelerate threat detection, enabling them to gain competitive advantage with a well-managed approach to meeting customer demands, protecting reputation and reducing total cost of risk. To learn more about why riskmethods is the intelligent way to manage risk, visit riskmethods.net or connect with us on LinkedIn.

**EcoVadis**
EcoVadis is the world’s most trusted provider of business sustainability ratings. Global supply chains, financial institutions and public organizations rely on EcoVadis to monitor and improve the sustainability performance of their business and trading partners. Backed by a powerful technology platform, EcoVadis’ evidence-based ratings are validated by a global team of experts, and are adapted to more than 200 industry categories, 160 countries, and companies of all sizes. Its actionable scorecards provide benchmarks, insights, and a guided improvement journey for environmental, social and ethical practices. Industry leaders such as Amazon, Johnson & Johnson, L’Oréal, Unilever, LVMH, Salesforce, Bridgestone, BASF, and ING Group are among the 90,000 businesses that collaborate with EcoVadis to drive resilience, sustainable growth and positive impact worldwide. ecovadis.com

**SAP**
SAP Ariba solutions create direct, intelligent connections between your business and your suppliers and targeted solution providers, redefining how you communicate, collaborate, and get work done. Your organization needs more from procurement. As business moves faster and faster, more spending is happening across more channels using more payment methods than ever before. And your customers are demanding more from the organizations they buy from and work with. They want more speed, better quality, the best experience, and full transparency into the impact you and your suppliers are making on the world. It’s up to procurement and supply chain managers to continue to control all the costs, manage the risks buried in your transactions, and do it all while making sure process doesn’t slow down progress. Using SAP Ariba solutions and Ariba Network – market leaders in spend management software – you can equip your company to be responsive and responsible, both today and in the future: and transform and transform the ecosystems of complex businesses into a living global map, down to any single supplier, anywhere.

- Buyers can manage the entire purchasing process as they control spending, find new sources of savings on both direct and indirect goods, and build healthy, ethical supply chains.

- Suppliers can connect with profitable customers and efficiently scale existing relationships, simplifying sales cycles and improving cash control along the way. sap.com & ariba.com

**C2FO**
C2FO is the largest platform for working capital. We serve over 1.7 million businesses representing $10.5 trillion in annual sales across more than 160 countries. Our online platform connects more than $110 billion of daily accounts payable and accounts receivable. Whether you need working capital or have excess working capital, Name Your Rate®, and the C2FO platform will match your request in seconds. You can accelerate AP or AR on demand, providing you, your customers and your suppliers greater control over cash flow. You can also utilize AR financing and other data-driven funding options. c2fo.com

The idea behind EBG | Network is as simple as it is a challenge. Gathering and sharing know-how and best practice experiences from a sourcing, procurement and finance perspective. Bridging those organizational silos and recognizing that change is not easy and that change cannot happen as a single event in a single function expecting real results.

Through interviews, webinars, Online conferences and annual conferences in Stockholm, EBG | Network gather companies from across the world, the most competent professionals we can think of and many of the most open-minded and eager to learn expert organizations and peers possible.

We can only hope to see you –IRL or virtually – welcome!
